

Physician Burnout and EHR Transitions in the Age of COVID

David Chestek D.O.

Assistant Professor of Emergency Medicine
Interim Chief Medical Information Officer UI Health.

OVERVIEW OF UI HEALTH

- 4,470 FTEs
- 720 Attending physicians
- 250 Advanced practice providers
- 800 Medical residents
- Annually:
 - >17K Discharges
 - >508K Clinic visits
 - >14K Surgeries
 - >41K ED visits
 - >1,750 Newborn deliveries

EHR'S AND BURNOUT

- Documentation related tasks
- Lack of autonomy
- Poor design of workflows
- Inbox
- Alerts/Cognitive fatigue
- Lack of work-life balance

Muhyaddin R, Elfadl A, Mohamed E, et al. Electronic Health Records and Physician Burnout: A Scoping Review. In: Mantas J, Hasman A, Househ MS, Gallos P, Zoulas E, Liaskos J, eds. *Studies in Health Technology and Informatics*. IOS Press; 2022. doi:10.3233/SHTI210962

Kruse CS, Mileski M, Dray G, Johnson Z, Shaw C, Shirodkar H. Physician Burnout and the Electronic Health Record Leading Up to and During the First Year of COVID-19: Systematic Review. *J Med Internet Res*. 2022;24(3):e36200. doi:10.2196/36200

SOLUTIONS

- Training
- Local Customization (templates and workflows)
- Scribes (cheating)
- Physicians practicing at the top of license (support staff)
- Reduce clicks/pop-ups
- Filter out irrelevant info
- Lessen documentation burden (sometimes not in our control)
- Throw it out (innovation)

Kruse CS, Mileski M, Dray G, Johnson Z, Shaw C, Shirodkar H. Physician Burnout and the Electronic Health Record Leading Up to and During the First Year of COVID-19: Systematic Review. *J Med Internet Res.* 2022;24(3):e36200. doi:10.2196/36200

Nguyen OT, Jenkins NJ, Khanna N, et al. A systematic review of contributing factors of and solutions to electronic health record–related impacts on physician well-being. *Journal of the American Medical Informatics Association.* 2021;28(5):974-984. doi:10.1093/jamia/ocaa339

WHY AREN'T WE THERE YET?

- Few objective studies evaluating EHR usage and provider burnout
- Lack of standardization or quantitative measures make broad conclusions difficult
- Every EHR is a bit different, not all functionalities are equally burdensome

Yan Q, Jiang Z, Harbin Z, Tolbert PH, Davies MG. Exploring the relationship between electronic health records and provider burnout: A systematic review. *Journal of the American Medical Informatics Association*. 2021;28(5):1009-1021. doi:10.1093/jamia/ocab009

Moy AJ, Schwartz JM, Chen R, et al. Measurement of clinical documentation burden among physicians and nurses using electronic health records: a scoping review. *Journal of the American Medical Informatics Association*. 2021;28(5):998-1008. doi:10.1093/jamia/ocaa325

WHY AREN'T WE THERE YET?

- Well-being can be overshadowed by short term goals that have measurable outcomes which leadership is accountable to

THERE IS ALWAYS SOMETHING ELSE TO DO

HERE BEGINS OUR TALE: EHR TRANSITION

3i Vision

Current State Problem

- Multiple Disparate Systems
 - Issues with Integration and Standardization
- Burning Platforms
 - **McKesson:** HealthQuest is at the end of its lifecycle with no replacement system.
 - **Cerner:** Vendor strongly recommends transitioning from HP/UX to Linux in order to improve performance and implement any additional functionality / solutions.
 - **Epic:** Pending Version Upgrade

Future State Vision

- **“One”** Clinically Integrated System
- **“One”** Integrated Enterprise-wide EHR
- **“One”** Integrated Business and Clinical Process
- **“One”** Integrated Business and Clinical Workflow

ADDED STRESSORS

- Epic On-site Visits: 75+
- Epic Workflow Walkthroughs: 100+
- Readiness Session: 350+
- CORe Meetings: 17
- Clinical Summit: 1
- High Impact Workflow Summit: 1
- Polar Vortex 2019: 1
- COVID Pandemic: 1

COVID

MAY 9TH 2020 SCHEDULED GO-LIVE

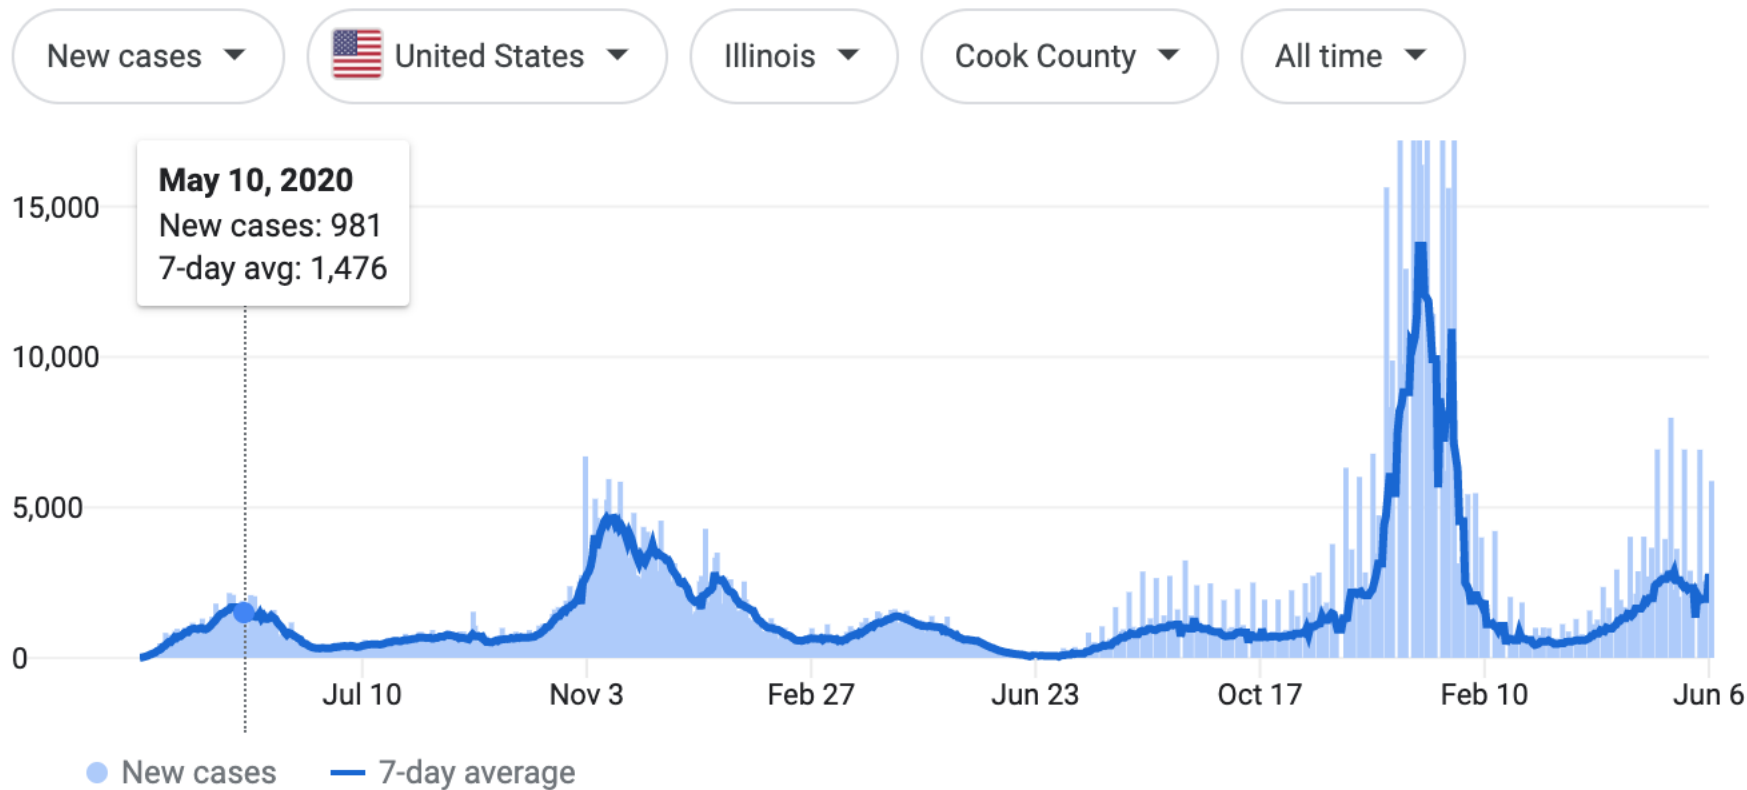

These data come from Cosmos, a HIPAA limited data set of more than 143 million patients

DECISIONS DECISIONS

- Legacy contracts expired June 30th (millions)
- Extending project consultant resources (millions)
- What if there is a worse surge in the fall?
- Need to set up virtual Training
- Reduced scope of in-person activities
 - Shadow charting in procedural areas
 - TDR
 - Go-live (Command Center, ATE, Superusers)
- Operational resources being pulled away
- March 25th decision to delay by 4 months

ORIGINAL GO-LIVE

NEW GO-LIVE (DELAYED BY 4 MO)

SHIFT OF FOCUS

- IS putting emergent COVID changes into legacy EHR
- While at the same time making sure we went live with all the newest COVID features in new EHR
- Added text messaging to scope
- Telemedicine
 - Inpatient
 - Outpatient

TRAINING CHANGES

	3/23	3/24	3/25	3/26	3/27
Total Classes	34	46	49	47	35
Total Registered	376	470	371	511	295
Completed	302	331			
No Shows	74	57			
In Process	n/a	82			

633 total users trained virtually

eLearning Modules 60% completed as of 3/25

OBSERVATIONS

- **Operations comes first – some areas have pulled back (ED, Molecular, IC)**
- **Some areas adapting well (OR, Pharmacy, Providers)**
- **Login Labs a struggle in Virtual Classes**
- **STS Classes are primarily taught by our Specialty Champions**
- **Resource issues, specifically in Scheduling and Registration**
- **Communication channels**

GO-LIVE SUPPORT CHANGES

- In person support scaled back
- Remote support added
- "Help Me" button attached screenshot
- Weekly testing of Command Center staff
- Work stoppage, onboarding agency staff

The screenshot shows a web application titled "Help Desk". At the top, there is a red navigation bar with icons for a globe, a wrench, a document, and buttons for "Help Me", "Print", and "Log Out". Below this, the main form is divided into several sections:

- Issue Type:** A dropdown menu with "Inpatient Clinical Documentation" selected.
- Details:** A section with a "High Priority" button (indicated by an upward arrow) and a "Low Priority" button (indicated by a downward arrow). It contains input fields for "Patient", "Subject", and "Help me!". Below these is a rich text editor with a toolbar including undo, redo, bold, italic, link, unlink, and a "100%" zoom level. The text area contains the instruction: "Enter a question and you will receive a call back at the number entered below within 5 minutes." followed by a placeholder "{...}" and another instruction: "Enter your question and you will receive a call back at the number you enter below within 5 minutes." and three asterisks "***".
- Follow-up Information:** A section with a "Contact" dropdown menu showing "HUTCHISON, KARI" with a "Me" button next to it. Below this is a "Phone Number" input field with "867-5309" entered.

At the bottom of the form, there are two buttons: "Send" (with a paper plane icon) and "Cancel" (with a red X icon). Below the "Send" button, there are two links: "View Session Information" and "View Screenshot".

CURRENT CHALLENGES

CONSTANT CRISIS

- 18 mo “sprint” of go-live prep (years of prior prep work)
- Initial COVID wave
- Telemedicine and COVID response in old system
- Go-live with new system during pandemic and work stoppage
- Telemedicine and COVID response in new system
- Mass vaccination site and pop-up vaccination sites with new system
- Automated patient communication to at risk communities for vaccination with new system
- New therapeutics
- COVID Research

WHEN DID THE SPRINT TURN INTO A MARATHON?

COMFORTABLE WITH THE SYSTEM

- Post Live Survey struggles at 1, 3 and 6 mo
 - Feeling supported in my use of the EHR
 - The training I received helps me do my job
- Continued lack of familiarity with available tools

FUTURE STEPS

SOLUTIONS

- **Training** – Targeted intervention from Signal data, Thrive
- **Local Customization** – Amb focused build effort, more to do
- **Scribes** – Active program
- **Physicians practicing at the top of license** – support staff
- **Reduce clicks/pop-ups** – Constant battle
- **Filter out irrelevant info** – Working with vendor and operations
- **Lessen documentation burden** – educate on new Amb rules
- **Throw it out** – perhaps...
